Professional Summary

Recent **Bachelor of Computer Applications (BCA)** graduate with strong foundation in web technologies including HTML, CSS, JavaScript, and Python with DJANGO. Experienced in developing full-stack web applications through academic projects and internships. Eager to leverage technical expertise and a passion for coding in a Full Stack Developer role to build efficient and user-friendly digital solutions.

Technical Skills

- **Programming Languages:** Python with Django
- **Web Technologies:** HTML5, CSS, JavaScript
- **Database Management:** SQLite
- **Tools & Platforms:** Git, VS Code

Education

Bachelor of Computer Applications in [Full Stack Web Development] 07/2022 – 04/2025

President Institute of Computer Application, Gujarat University CGPA: 7.5 /10.0

Currently Learning Data Science with AI & ML

Projects

Choose Your Festive Look

- *Technologies Used:* Python with Django, HTML, CSS, JavaScript, SQLite
- Developed a fully functional e-commerce website for clothing using Django to handle backend logic and SQLite for database management.
- Implemented features like user authentication, product browsing, shopping cart, and order processing, resulting in a seamless shopping experience.
- Collaborated with 3 team members to deliver a responsive and user-friendly platform within the project deadline.
- GitHub Repository: <https://github.com/sakshipatel7435/CYFL>

Internship Experience

Software Development Intern (Full Stack) 06/2024 - 04/2025

InfoLabz, Ahmedabad

- Contributed to the development of a clothing e-commerce website using Python with Django, HTML, CSS, JavaScript, and SQLite.
- Implemented key features such as product listings, user authentication, and shopping cart, improving site usability and functionality.
- Collaborated with a 3-member team to successfully deliver a responsive, full-stack web application within the internship timeline.

Certifications

- **Training** from **Data WIND** (09/2024)
- **Software Development Training** from **Infolabz** (04/2024)

Academic Achievements & Activities

- **Internship at Infolabz** – Currently developing an **e-commerce website for clothing**, working on both frontend and backend features.
- **Self-Learning Projects** – Continuously enhancing skills through online tutorials and practical coding exercises in web development.
- **Technical Interest in Web Development** – Actively exploring tools like HTML, CSS, JavaScript, and frameworks to build modern websites.
