

SAKSHI PATEL

AI-Enabled Data Scientist

7435821716 | sakshipatel7435@gmail.com | Ahmedabad, Gujarat | [LinkedIn](#) | [GitHub](#) |

Professional Summary

BCA graduate currently specializing in **Data Science**, Machine Learning, and Deep Learning. Proficient in Python programming, data analytics, and building predictive models using TensorFlow and Scikit-Learn. Strong foundation in statistical analysis, data preprocessing, and database management. Passionate about leveraging AI and neural networks to extract insights and solve complex problems. Seeking an entry-level **Deep Learning Engineer** role.

Technical Skills

- Programming Languages:** Python (NumPy, Pandas, Matplotlib, Seaborn, Sklearn), MySQL, MongoDB
- Machine Learning Techniques:** Regression, Classification, Clustering, Ensemble Methods (Random Forest, XGBoost), Hyperparameter Tuning, Model Evaluation Metrics
- Deep Learning & AI:** TensorFlow, Keras, Artificial Neural Networks (ANNs), Convolutional Neural Networks (CNNs), Recurrent Neural Networks (RNNs)
- Core Concepts & Mathematics:** Descriptive & Inferential Statistics, Probability, Model Evaluation & Tuning, Data Preprocessing, Exploratory Data Analysis (EDA)

Projects

NEET Result Mirror, Analytics & Predictive Platform (*Python, Sklearn, Streamlit, Random Forest*)

- Built an interactive Streamlit web application featuring a multi-tab interface for college prediction and cut-off trends.
- Implemented live on-cloud model training using Random Forest Classifier to predict top 5 eligible medical colleges.
- Developed a cut-off analysis data feature by grouping and aggregating historical data for opening and closing ranks.
- Integrated a student registry form that dynamically generates custom text and redirects to the WhatsApp API for notifications.

Product Recommendation System (*Python, Sklearn, Streamlit, NearestNeighbors*)

- Built a personalized recommendation engine from scratch using customer purchase history, ratings, and browsing behavior.
- Implemented **Collaborative Filtering** and **Content-Based Filtering** techniques to predict user preferences and suggest relevant products.
- Handled data preprocessing, missing values, and Exploratory Data Analysis (EDA) on user interaction datasets.

Education

Bachelor of Computer Applications (BCA)	July 2022 – April 2025
President Institute of Computer Application, Gujarat University CGPA: 7.5	

Training & Internship Experience

Software Development Intern (Full Stack) | InfoLabz, Ahmedabad June 2024 – April 2025

- Built a full-stack e-commerce web application **Choose Your Festive Look** as a final year academic project.
- Built robust backend architecture, secure user authentication, and product category management using Django.
- Managed database integration using SQLite, optimizing queries for efficient data handling and system integrity.

Certifications

- Software Development Training: **InfoLabz**
- Training Program: **Data WIND**
- Currently Pursuing: Data Science with AI & Machine Learning – Tops Technologies, Ahmedabad**
